Deep Groove Ball Bearing

Self-Aligning ball bearing

Cylindrical-Roller-Bearing

Self-Aligning ball bearing

Bearing Block

Tapered roller bearing

Thrust Bearing

Angular contact ball bearing

Needle Roller Bearing

Deep Groove Ball Bearing

Deep Groove Ball Bearing
Deep Groove Ball Bearings (DGBB) are widely used for Transmission, Instrumentation, Electrical Machinery Household Appliances, Internal Combustion Engines Vehicles, Agricultural Machinery Construction Machinery etc.

Spherical roller bearing

Spherical roller bearing
Spherical roller bearing is widely used in papermaking machinery, speed reducer, railway vehicle axle, gear box bearing, rolling mill rolling mill rolls, crusher, vibrating screen, printing machinery, woodworking machinery, all kinds of industrial reducer, etc.

Self-Aligning ball bearing

Aligning ball bearing is widely used in precision instruments, low noise motors, automobiles, motorcycles, metallurgy, rolling mill, mining, petroleum, paper, cement, sugar and other industries, etc.

Single Row Tapered roller bearing

Tapered roller bearing is widely used in automotive, rolling mill, mining, metallurgy, plastics machinery and other industries, etc.

Thrust Ball Bearings

There are two types of thrust ball bearings, which are one-way and two-way. High quality steel - a super clean steel that can extend the life of the bearing by 80%

Cylindrical-Roller-Bearing

Cylindrical roller bearing is widely used in large and medium-sized motor, locomotives, spindle, internal combustion engines, generators, gas turbines, reducer, rolling mill, vibrating screen and lifting transportation machinery, etc.

Angular contact ball bearing

Angular contact ball bearing is widely used in machine tool spindle, high frequency motor, gas turbine, centrifugal separator, small car front wheel, differential pinion shaft, booster pump, drilling platform, dividing head, filling machine, oil pump, roots blower, air compressor, all kinds of transmission, fuel injection pump, printing machinery, planetary reducer, extraction equipment, cycloid reducer, food packaging machinery, electric welding machine, gravity type spray gun, etc.

Thrust taper roller-bearing

Thrust cylindrical roller bearings are mainly used in heavy-duty machine tools, high power marine gear boxes, oil rigs, vertical motors and other machinery.

Needle Roller Bearing

SKF

Needle bearing is widely in rack aircraft, missiles of the main wing of the shaft, machine tools, transmission printing machinery, grass machinery, agricultural machinery, CNG equipment rails with rollers, conveyor lines etc.

Oil Seal

SKF

World Best Industrial Oil & Dust Protect Seal

Bearing Housing

SKF

Bearing block is widely used in mining metallurgy, agriculture, chemical textile, printing transportation machinery etc.

General Transmission

Carding Machine
Cylinder Drier
Blower
Cone drum for Spinning Frame
Motor Drive for various Textile Machinery

Mitsuboshi Timing Belt

MITSUBISHI

Advantages
High Capacity
Improved registration
Reduced noise
No lubrication required
No stretching due to wear
Corrosion resistance
Excellent abrasion resistance
Clean operation
Long trouble-free service

Rubber V-Belt

MITSUBISHI

Polyurathane V-belts Long belt life on small pulleys and compact drives. High Performance an smooth running for Precision applications Greater shaft speeds, in excess of 1000 rpm.

V Belts & Timing Belts

Steam control valve

Fuel & Oil flow meter

Water flow meter

Steam flow meter

Steam trap

Pneumatic angle seat valve

Air Actuator valve

Butterfly valve

Solenoid valve

Globe valve

Pneumatic Solenoid valve

Pressure Gauge

Safety valve

Non-Return Valve

Pneumatic pipe

Pneumatic Cylinder

Hydraulic pump

Gas burner

STRATEGIC BUSINESS UNITS

1. UNIQUE BEARING & MACHINERIES
2. S. BOILER ZONE

Nawabpur Road, Gawsia Plaza, Dhaka-1000.
